RE: 2100 Wyandotte, Kansas City, MO

Dear Ms. Koesterer:

It has been over a month since I filed a complaint with you about the hazardous liquid being emitted from the floor of my tenant, Rosse Lithographing Co./Gloe Graphics Inc. at 2100 Wyandotte.

I have heard no response from you, and you were to get back with me after you found the test results that were sent to Ms. Audrey Asher at your facility.

I certainly hope you are not ignoring this problem because of my other difficulties at 2100 Wyandotte.

The complaint I filed with you about my tenant, is a separate and entirely different hazardous waste matter, and I feel strongly should be looked into.

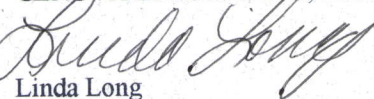

May I reiterate again, this oil is leaking from Rosse's floor onto the garage below in many locations. Mr. Gloe has approximately 90 employees there at the property working 24 hours a day, 7 days a week. The liability to the employees, as well as to the customers coming into the building is great.

I hope there is not another incident which could cause injury or a health hazardous to any persons who may happen to be in the building.

Thanking you in advance for help to this **immediate** problem.

Sincerely,

GENOVA ENTERPRISES, INC.

Linda Long
